

Accessing student software at home.

As BGS student, you are able to download and use most of the software available in school, follow these instructions to gain access and download them.

1. Log into your own account using the remote access:
<https://filecloud.bourne-grammar.lincs.sch.uk>
2. You will now need to login in using your user name and password.
3. Once you are logged in, you can now access the open drive (the G: Drive). Click on this.
4. Then look for the Systems and Control file and select this.
5. Inside this file, there is a 'Student Home software' file. Click on this.
6. This file contains the following software you can use at home:
 - Arduino
 - Circuit Wizard 3
 - DIYLc
 - SolidWorks
 - Techsoft 2D
 - Replicator G

In all of these files, you will either find the licenses or the software has the licenses pre-installed. This is a great resource to use to design and build your own projects at home.
